

Greenacre Environmental Systems Ltd.

Quality and Environmental Policy

Greenacre Environmental Systems Ltd. is committed to maintaining the highest standards in all our activities to provide a quality service to at least meet our clients' and other interested parties' expectations and other requirements, but in a responsible and considerate manner, to benefit the environment, our stakeholders, our employees and the business as a whole.

Key to Greenacre Environmental Systems Ltd.'s commitment to continual improvement is to understand, and at least meet, both the needs of our clients and the natural environment, thereby achieving customer satisfaction in a sustainable manner. Our aim is to do things right, first time, every time, and to this end we aspire to:

- Continually understand and fulfil the changing requirements and expectations of our clients and other interested parties in a profitable, safe and sustainable manner; thereby achieving customer satisfaction and compliance with all regulatory, statutory and other requirements as a minimum;
- Understand what constitutes acceptable standards, through the setting, monitoring and reviewing of client focused objectives and targets, and ensure these are communicated to all persons working on our behalf;
- Do everything in our power to prevent pollution, protect the environment and assist third parties working on our behalf to work in a similarly environmentally conscientious manner;
- Maintain dialogue with our clients, employees and other stakeholders;
- Control, communicate and review all of our processes that are crucial to delivering client satisfaction, and achieving compliance with all regulatory, statutory and other requirements, notably through the implementation and maintenance of our Integrated Management System (IMS).
- Provide a working environment to encourage employees at all levels to direct their abilities to the continued success of the organisation, the interests of the natural environment and the satisfaction of clients, as well as their own personal fulfilment.

Greenacre Environmental Systems Ltd. is committed to achieving continual improvement of both its performance and the effectiveness of its processes, as contained within its IMS, and to comply with the requirements of ISO9001 and ISO14001. Adhering to these will allow us to understand, control and enhance how we meet the needs of our clients, and interact with and impact on the environment, as well as to achieve our strategic direction.

The Managing Director is responsible for the effective implementation of this policy, and the wider IMS, but with the assistance and commitment of all employees within their specific area of responsibility. Notably, the Director with Responsibility for the IMS shall be responsible for ensuring that this policy and the IMS is implemented and maintained throughout Greenacre Environmental Systems Ltd.

Greenacre Environmental Systems Ltd. will seek to embed this policy into 'business as usual' activities, and will communicate them to all our employees, third parties working on our behalf and other interested parties via our IMS, job packs and website. This policy will be reviewed annually to ensure it continues to meet the needs of the business, and reflects new developments, changes in legislation and feedback from customers and all those working on our behalf.

Vaughan Hobson
Managing Director
